AUDITORY IMAGE MODEL (AIM)
functional
physiological
middle ear filtering
middle ear filtering
spectral analysis
gammatone filtering
basilar membrane motion .
spectral analysis
transmission line filtering
spectral sharpening
compression
basilar membrane motion .
neural encoding
compression
two-dimensional
adaptive thresholding
neural activity pattern .
neural encoding
inner haircell simulation
neural activity pattern .
time-interval stabilisation
strobed temporal integration
auditory image .
time-interval stabilisation
autocorrelation
correlogram .
