Target version:			
Description			
<p>Since we only ever open one audio file at a time, we don't need the file names in the panes.</p> <p>In the selection pane we could instead write "Selection"</p> <p>Chris, if you give me a lil hint where to search, I will do this.</p>			

History

- Assignee set to Matthias Mauch
- % Done changed from 0 to 70

The first step turned out to be easy. The file names are now off.

I haven't figured out how to add a particular name like "selection" to the selection strip. First time users might find that helpful, but maybe they'll find out anyway.
