Sonic Visualiser - Bug #1242
Playhead in aligned track does not reflect actual play position

2015-05-22 05:47 PM - Chris Cannam

Status:	New		**Start date:**	2015-05-22

Target version:				

Description

- Load two audio files
- Hit Align button to switch on alignment
- Play the second (non-reference) file
- Observe that the playhead does not follow the actual playback position in that file; instead it follows the alignment with the reference file which is then aligned back again (this is most noticeable if the alignment is not very good)
- Hit Align button to switch alignment off again
- Play the second file again
- Observe that the playhead is still using the alignment even though alignment has now been switched off
