<b>Target version:</b>			

#### Description

To be explored: can/should we add a playhead on a scrubber/transport bar so you can 1) see where you are in the fragment and 2) optionally click somewhere else to fast forward/rewind to a certain position in the fragment, for instance if you want to compare the same exact moment in different, synchronised fragments.

If we do, this should be optional/configurable because not everyone may want it. (I'm not even sure if I do)

It seems that stopping and starting again doesn't quite work yet - the timer says '0:00' when you hit stop (expected) but then continues from where it stopped (e.g. 8 seconds) while the music starts from the top.
