

EasyMercurial - Bug #132

Windows version crashes on failing to open a URL

2011-04-04 10:46 PM - Chris Cannam

Description

1. Supply an ssh URL as remote for clone
2. EasyHg says it can't open the URL -- More Details shows "No response from remote hg" error
3. Click OK on that error dialog
4. EasyHg pops up another similar error dialog without a More Details button, but before you get a chance to click anything, it crashes.

History

#1 - 2011-04-06 11:16 AM - Chris Cannam

For ssh URLs, we need a suitable ssh client, ideally TortoisePlink. hg --config ui.ssh=TortoisePlink etc and we're off.

#2 - 2011-05-24 01:31 PM - Chris Cannam

- Subject changed from *Windows version won't open ssh URLs, crashes on failing to Windows version crashes on failing to open a URL*

#3 - 2011-05-24 01:32 PM - Chris Cannam

- Status changed from *New* to *Closed*

Split out ssh failure into a separate bug (#161) and renamed this one to cover the crash only. Crash fixed in commit:5cc0d897eb26.
