

Web Audio Evaluation Tool - Bug #1325

Storing results on web server not working

2015-07-09 01:06 PM - Brecht De Man

Status:	Resolved	Start date:	2015-07-09
Priority:	Urgent	Due date:

Target version:			
Description			
As far as I can tell, currently the client gets the result file, but I don't see how it is (or can be) stored on the server, which is the goal if you are running experiments remotely.

History

#1 - 2015-09-10 12:57 PM - Nicholas Jillings

- Status changed from New to In Progress

PHP Script now included to handle saving. Your projectReturn attribute must be "save.php" to invoke the PHP script. The Script can exist on a third party server for data collection with media hosted locally! Just give the full URL.

#3 - 2015-11-27 12:27 PM - Nicholas Jillings

- Status changed from In Progress to Resolved

Should now be resolved. Also project return of "/save.php" will now work for both Python and PHP server instances.
