

## Web Audio Evaluation Tool - Bug #1464

### Random string at the end of saved file name doesn't work when same file stamp

2015-11-26 03:07 PM - Brecht De Man

<b>Status:</b>	Resolved	<b>Start date:</b>	2015-11-26
<b>Priority:</b>	Immediate	<b>Due date:</b>	
<b>Assignee:</b>	Nicholas Jillings	<b>% Done:</b>	50%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
<p>The very purpose of the random string is to NOT overwrite files saved at the same time, but this does not seem to happen. Rather, I hit enter on two machines at once, and both results were saved with a 200 code... but both with the same name, so one has overwritten the other.</p> <p>It seems that whenever the time is exactly the same, the generated string is also the same (unless I got very, very (un)lucky that a truly randomly generated string came out the same).</p> <p>(Both say '[Log] Save OK: Filename "saves/save151126134348-IUoLN8.xml",33701B (core.js, line 685)')</p> <p>It was a different HTML file, different set of songs etc. Both in Safari.</p>

#### History

##### #1 - 2015-11-27 09:44 AM - Nicholas Jillings

- Related to Feature #1456: Files saved to server: higher resolution than seconds (or hash) added

##### #2 - 2015-11-27 09:45 AM - Nicholas Jillings

- % Done changed from 0 to 50

PHP Server now performs SHA1 hash to end of the filename instead of random string generation.
