#### Description

In Chrome, when replying to such questions as 'age' and 'gender', the console shows a jQuery event, an object which doesn't seem to include any information on the subject's responses (e.g. when you want to reconstruct a survey from just the console log, or just to troubleshoot).

#### History

#1 - 2015-12-18 05:47 PM - Nicholas Jillings

- Status changed from New to Resolved

Fixed now. Make sure that your option nodes for a checkbox have a name attribute, and for radio they have an id attribute.
