Web Audio Evaluation Tool - Feature #1525
Attempt to submit unsuccessfully should be logged in results XML

2016-01-12 12:23 PM - Brecht De Man

Status:	In Progress		**Start date:**	2016-01-12

Target version:				

Description

To my knowledge, when someone doesn't pass one of the checks (use of scale, comment everything, play every sample, ...) this is not logged in any way.

Logging this (with test time) could help establish whether someone tried to submit unsuccessfully, then did some useless moving around of sliders or typing something meaningless in the comment boxes to be able to proceed. Right now, we can not really assess the subjects based on anything we explicitly require in order to proceed - only things that are measured but not enforced allow to do some post-test filtering of 'bad' subjects.

History

#1 - 2016-02-01 10:40 AM - Nicholas Jillings

- Status changed from New to In Progress

- % Done changed from 0 to 50

These now post error messages into the XML result using the test page timer as a reference. APE, which uses custom checkers, needs to be updated to post nodes. Currently the nodes just respond with the message displayed in the console. More information could be added but will need to work out a way to show that.
