

Bela - Feature #1533

Mount filesystem (or part of it) as read-only, to avoid file corruption when shutting down abruptly

2016-01-20 03:51 PM - Giulio Moro

Status:	Closed	Start date:	2016-01-20
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
<div>The COSMO project for instance mounts it as read-only, but switches to r/w when you ssh into it</div> <div>http://cosmoproject.github.io/</div>

Not sure this is really needed.

It seems that it is most important to call `sync` before abruptly pulling the plug
