Web Audio Evaluation Tool - Bug #1558
Arbitrary fragment URL

2016-02-11 10:12 AM - Brecht De Man

Description

Would be good to be able to add arbitrary, 'full' URLs for fragments, for instance when they are hosted on the Open Multitrack Testbed.

Suggested by Dave I believe.

So instead of just 'audio/file.wav' you could also have

'http://c4dm.eecs.qmul.ac.uk/multitrack/FredyV/InTheMeantime/Mixes/McG-A.wav' or something.

History

If the parent <page> node's hostURL is blank, then the <audioelement> url can be a fully qualified URL. However, it is then up to the hosting machine whether it will allow cross-domain hosting.
