Description

surveyentry type="checkbox"
items answers should be left-aligned

currently they are centered

I'd say left aligned looks worse than centre aligned. Core.js line 475 "this.popupResponse.align = 'center';" will handle that and you can see.

I prefer it left aligned, but that's arguable I guess.
Definitely in case of left aligned we need some margins

Markers are now left aligned. We need to dynamically align them such the overall position is central but the radios are aligned.

Fixed in dev_main. The checkbox/radio entries are left aligned but the content is still central.
