

Web Audio Evaluation Tool - Bug #1567

It might be useful to have a stop button on each sample that is currently playing in the AB-interafce

History

#1 - 2016-02-11 02:17 PM - Nicholas Jillings

Fixed in rev 508 on dev_main. The AB interface still has the 'Stop' button, but the element specific playback start buttons can issue a command if they are still playing. The text reflects which element is being listened to as well as the currently active element will read 'Stop' and inactive elements will read 'Play'.

#2 - 2016-02-11 02:18 PM - Nicholas Jillings

- Status changed from New to In Progress

#3 - 2016-02-11 02:22 PM - Nicholas Jillings

- Status changed from In Progress to Resolved

Updated for all other button based interfaces where each element has a specific playback (so, all except APE).
