

Web Audio Evaluation Tool - Bug #1571

Style is set by HTML attributes instead of css

2016-02-11 08:09 PM - Giulio Moro

Status:	Resolved	Start date:	2016-02-11

Target version:			
Description			
Is this not bad practice? e.g.: Core.js line 475 "this.popupResponse.align = 'center';"			

History

I'd argue this is valid since it is specified in HTML. You could argue that HTML attribute should not control a layout property, but it is one alignment method which works universally compact. If there is a better solution, can you let me know.

#2 - 2016-02-21 03:32 AM - Giulio Moro

align was deprecated in HTML 4.01 and removed in HTML 5. Alternative, css-based solutions can be found here:
