Web Audio Evaluation Tool - Bug #1579
Robustness missing audio files

2016-02-16 03:27 PM - Brecht De Man

Status:	New		**Start date:**	2016-02-16

Target version:				

Description

The test crashes if one of the audio files in the whole test cannot be found. Perhaps a better handling would be to display an alert with the missing file name (as early as possible, e.g. at the start of the test as soon as the file is not found).

Especially problematic with a large test where a typo would only trigger an error in some cases (e.g. one of the 18 pages has a typo in it, and only 3 pages are selected for each test).

History

It should throw a console message saying it could not load an audio file.

The entire alert system should be updated anyway, using the HTML alert is not robust anyway compared to an on-page alert.
