

Web Audio Evaluation Tool - Bug #1580

Random positions (APE): avoid overlapping markers

2016-02-16 09:54 PM - Brecht De Man

Status:	In Progress	Start date:	2016-02-16
Priority:	Low	Due date:	
Assignee:	Nicholas Jillings	% Done:	70%

Target version:			
Description			
<p>In case of a single axis with multiple markers AND random initial positions, users sometimes get confused when they can't find a certain marker. Perhaps there could be a 'fix' here which checks whether some of these markers are in (almost) the same position, so that one could be nudged/repositioned.</p>			

History

#1 - 2016-02-22 12:40 PM - Nicholas Jillings

Perhaps the markers could have a border to help identify when they are partially overlapped. Will look into this in code, perhaps triggering a repeat of the random placement.

#2 - 2016-03-16 04:41 PM - Nicholas Jillings

- Status changed from New to In Progress

- % Done changed from 0 to 70

Markers now have borders to help distinguish them.
