#### Description

for instance

```
<div class="attribute" name="id"><span>ID: </span><input></div>
```

Among the consequences, this makes it difficult to select them properly with css.

Ideally, I would want to be able to do

```
div.attribute input[type=text]{  
  width: 400px;  
}
```

instead I have to do something like:

```
div.attribute input[type=radio], div.attribute input[type=checkbox]{  
  width: 10px;  
}  
div.attribute input{  
  max-width: 100%;  
  width: 300px;  
}
```
