Description

Steps to reproduce the problem:

- go to http://localhost:8000/test_create/test_create.html
- drag and drop AB_example.xml
- click "export to XML" and save file with name, e.g.: ABh.xml
- go to http://localhost:8000/index.html?url=example_eval/ABh.xml
- you get the following message on screen

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element audioelement: Schemas validity error : Element 'audioelement', attribute 'marker': 'false' is not a valid value of the local atomic type.

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml:1: element surveyelement: Schemas validity error : Element 'surveyelement': This element is not expected. Expected is (surveyentry).

document.xml fails to validate

The above is valid for the default branch.

In the Dev_main branch, result is similar, just you get less error lines

document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml:1: element surveelement: Schemas validity error : Element 'surveelement': This element is not expected.
Expected is (surveyentry).
document.xml fails to validate

Note: re-importing the exported xml file into test_create does not cause any alert.
Attached the AB_example.xml and ABh.xml (generated from Dev_main) files

History

#1 - 2016-02-22 02:54 PM - Nicholas Jillings

- Status changed from New to Resolved

Fixed in dev_main and tested using all example XMLs.
