

Web Audio Evaluation Tool - Bug #1613

url cannot refer to an external url

2016-02-21 05:07 AM - Giulio Moro

Target version:			

Description

The url attribute is always interpreted as a relative url, whereas absolute urls should be allowed (e.g.: when they contain <http://> or <https://> or they start with //)

e.g.: this line in the xml file

```
<audioelement url="http://omctreviso.it/wav/Ab9-Manuals%20out-number1-velocity004.wav" id="track-0"/>
```

causes http://localhost:8000/index.html?url=example_eval/ABh.xml to

```
GET http://localhost:8000/example_eval/http://omctreviso.it/wav/Ab9-Manuals%20out-number1-velocity004.wav
```

- Status changed from New to Resolved

You need to set the hostURL attribute of the parent <page> node to null.

#2 - 2016-02-22 02:59 PM - Nicholas Jillings

Or rather, you need to have the hostURL="" or not have it in the attribute at all, where it will default to equal "".
