Target version:

## **Description**

I have a single test-0.xml file in saves (obtained from an AB interface test, attached to this post). when running the python scripts I obtain the following results

\$ pyhton comment parser.py

Use: python comment parser.py [XML files location]

Using default path: ../saves

Traceback (most recent call last):

File "comment\_parser.py", line 73, in <module>

commentstr = audioelement.find("./comment/response").text

AttributeError: 'NoneType' object has no attribute 'text'

\$ pyhton evaluation stats.py

Use: python evaluation\_stats.py [results\_folder]

Using default path: ../saves

test-0.xml

TOTAL: 0 min 0 s Number of XML files: 1 Number of pages: 0 Number of fragments: 0

Traceback (most recent call last):

File "evaluation\_stats.py", line 163, in <module>

" (" + str(round(100.0\*total empty comments/number of fragments,2)) + "%)"

ZeroDivisionError: float division by zero

\$ pyhton generate report.py

Use: python generate\_report.py [results\_folder] [no\_render | -nr]

Using default path: ../saves/

Traceback (most recent call last):

File "generate\_report.py", line 310, in <module>

" (" +  $str(round(100.0*total\_empty\_comments/number\_of\_fragments,2)) + r"\%)\\"+'\n\t\t\t'\t'$ 

ZeroDivisionError: float division by zero

\$ pyhton score\_parser.py

Use: python score\_parser.py [rating\_folder\_location]

Using default path: ../saves

\$ pyhton score plot.py

Use: python score\_plot.py [rating folder] [plot\_type] [-I/-legend]

Type 'python score plot.py -h' for help.

Using default path: ../saves/ratings/ with boxplot.

\$ pyhton timeline view.py

2024-05-19 1/4

```
$ pyhton timeline view movement.py
   Use: python timeline_view_movement.py [XML_files_location]
   Using default path: ../saves
after the scripts, the content of the saves folder is as follows. Is everything ok or am I missing something because of the above errors?
   ./ratings
   ./ratings/test-0-ratings-box.pdf
   ./ratings/test-0-ratings.csv
   ./ratings/test-1-ratings-box.pdf
   ./ratings/test-1-ratings.csv
   ./ratings/test-10-ratings-box.pdf
   ./ratings/test-10-ratings.csv
   ./ratings/test-11-ratings-box.pdf
   ./ratings/test-11-ratings.csv
   ./ratings/test-12-ratings-box.pdf
   ./ratings/test-12-ratings.csv
   ./ratings/test-13-ratings-box.pdf
   ./ratings/test-13-ratings.csv
   ./ratings/test-14-ratings-box.pdf
    ./ratings/test-14-ratings.csv
   ./ratings/test-15-ratings-box.pdf
   ./ratings/test-15-ratings.csv
   ./ratings/test-16-ratings-box.pdf
   ./ratings/test-16-ratings.csv
   ./ratings/test-17-ratings-box.pdf
   ./ratings/test-17-ratings.csv
   ./ratings/test-2-ratings-box.pdf
   ./ratings/test-2-ratings.csv
   ./ratings/test-3-ratings-box.pdf
   ./ratings/test-3-ratings.csv
   ./ratings/test-4-ratings-box.pdf
   ./ratings/test-4-ratings.csv
   ./ratings/test-5-ratings-box.pdf
   ./ratings/test-5-ratings.csv
   ./ratings/test-6-ratings-box.pdf
   ./ratings/test-6-ratings.csv
   ./ratings/test-7-ratings-box.pdf
   ./ratings/test-7-ratings.csv
    ./ratings/test-8-ratings-box.pdf
   ./ratings/test-8-ratings.csv
   ./ratings/test-9-ratings-box.pdf
   ./ratings/test-9-ratings.csv
    ./read.txt
   ./test-0.xml
    ./test-11
    ./test-11/test-11-comments-track-23.csv
```

Use: python timeline\_view.py [XML\_files\_location]

Using default path: ../saves

2024-05-19 2/4

./timelines ./timelines\_movement

#### History

## #1 - 2016-02-22 03:08 PM - Nicholas Jillings

Brecht is best to talk through these. However I think it is most likely down to the python scripts not updated since the last specification change. I don't have some of the packages anyway so I can't test them.

#### #2 - 2016-02-22 03:09 PM - Nicholas Jillings

- Assignee set to Brecht De Man

### #3 - 2016-02-22 05:29 PM - Brecht De Man

What Nick said. Will look at this asap!

Thanks for the exhaustive bug report. More output/errors/screenshots always welcome.

#### #4 - 2016-02-22 05:35 PM - Brecht De Man

Are you aware you're writing 'pyhton'? Is this a thing?

I mean to do the plotting and maybe also comment display in the 'analyse.html', although I may keep the Python scripts if that makes sense.

The

Use: python timeline\_view\_movement.py [XML\_files\_location]
Using default path: ../saves

notifications are not (necessarily) errors, it just tells you the default path (which is not '.'!) is being used since you didn't give an XML file location. Is this confusing/wrong?

### #5 - 2016-02-22 05:41 PM - Giulio Moro

oh well the pyhton thing was a typo when I copied it here.

I included the listing of the commands I typed and the list of files I obtained as a result.

Yes, I would say printing the "Using" line when the usage is correct is a bit confusing.

I guess to make the thing more intuitive, the script should print a brief of what it is going to do and/or a list of the generated files.

#### #6 - 2016-02-22 09:41 PM - Giulio Moro

- Status changed from New to In Progress
- Assignee changed from Brecht De Man to Giulio Moro
- % Done changed from 0 to 90

I pushed two lines worth of changes which make it work for me.

This may be fixed by my push, but please Brecht double check it

2024-05-19 3/4

I encountered a new issue which I am about to post in a new issue (hence the name).
