

Web Audio Evaluation Tool - Bug #1622

response from save.php is not parsed correctly by xmlhttp

2016-02-22 04:07 AM - Giulio Moro

Status:	Resolved	Start date:	2016-02-22
Priority:	Normal	Due date:

Target version:			

Description

... as a consequence, the xmlhttp.responseXML is always empty.
setting

```
xmlhttp.overrideMimeType('text/xml');
```

as I did for #1616 does not seem to work.

I had to use the stronger workaround suggested here <http://stackoverflow.com/questions/3781387/responsexml-always-null> :

```
var parser = new DOMParser();  
var xmlDoc = parser.parseFromString(xmlhttp.responseText, "application/xml");
```

This works. patch file attached

maybe this is a php-version- or php-configuration-dependent issue?

It happens to me when using apache2 and

PHP 5.5.30 (cli) (built: Oct 23 2015 17:21:45)

Copyright (c) 1997-2015 The PHP Group

Zend Engine v2.5.0, Copyright (c) 1998-2015 Zend Technologies

on MacOS El Capitan

(when running the server in python it works fine.)
