Web Audio Evaluation Tool - Bug #1626 generate report.py: LaTeX Error: Too many unprocessed floats.

2016-02-22 09:50 PM - Giulio Moro

Status:	New	Start date:	2016-02-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description		•	

I have many (53) pages in my AB interface. I only have one test{}.xml file (attached).

when I do

I get

! LaTeX Error: Too many unprocessed floats.

(plus a bunch of lines which are in the attached log)

Google helped me: http://www.tex.ac.uk/FAQ-tmupfl.html

It looks like you need some text between images sometimes...

I manage to get the Latex to compile by

replacing

\end{figure}

with

but there must be a better way ...

Thanks soundsoftware for not allowing me to edit the original post.

I forgot a line between

when I do

2024-05-20 1/2

	_
an	С

I get

should have been

when I do

python python generate_report.py

I get

...

#2 - 2016-02-22 09:52 PM - Giulio Moro

of course it was

python generate_report.py
