

Web Audio Evaluation Tool - Bug #1653

Issue when passing on XML location through URL

2016-03-08 03:55 PM - Brecht De Man

Description

e.g. in the case of

`brechtdeман.com/listeningtest/index.html?url=tests/A.xml`

when sent through Facebook, for instance, the forward slash in the url argument becomes the hex code `%2F`, after which the test can't be opened (and `index.html` is simply loaded).

Can this be 'caught', i.e. can `%2F` be parsed back to a forward slash? The alternative is to keep all XML files at top level, which isn't pretty or desirable.

History

#1 - 2016-03-08 06:03 PM - Giulio Moro

we should always `encodeURIComponent()` the url, and `decodeURIComponent()` it before using it.

Note that this way links in the current format will keep working.
