Target version:			

Description

unless I am missing something obvious, analyse.html is broken at the moment.

reproduce bug:

- hg update 65c7223bd817

- apply the following patch:

```
--- a/analyse.html Thu Mar 10 17:08:10 2016 +0000
```

```
+++ b/analyse.html Sat Mar 12 16:32:14 2016 +0000
```

```
@@ -24,7 +24,7 @@
```

```
    xmlFileFolder = "saves";
```

```
    // array of XML files
```

```
    // THIS IS WHERE YOU SPECIFY RESULT XML FILES TO ANALYSE
```

```
-    var xmlFiles = ['test-2.xml'];
```

```
+    var xmlFiles = ['save-c544lgppw0ckgscgg4c0cg000gco8cg.xml'];
```

- copy the attached file to /saves/ (generated through http://localhost/index.html?url=example_eval/radio_example.xml)

- will fail with console message Uncaught TypeError: Cannot read property 'getElementsByTagName' of undefined

Similarly, all python scripts fail as well.
