Target version:			

Description

.. and then overridden in each <page>

so that for instance you can define
<scales>
<scalelabel ... .
</scales>

just once for the whole test, in case it is the same for all the pages, or you can set defaults in <setup> and then override in each page if needed

History

#1 - 2016-03-14 02:03 PM - Nicholas Jillings

This is the default behaviour anyway. The only exception is the <scales>.
