Description

final screen says "Thank you. your session has been saved." When closing the browser it still asks to stay or leave, in firefox going as far as to say "This page is asking you to confirm that you want to leave - data you have entered may not be saved".

Might be best to add to the thank you text "You may now close this tab/window etc." just so they know it's OK.

I believe I fixed this in my branch

#2 - 2016-03-21 01:46 PM - Nicholas Jillings

- Status changed from New to Resolved

Fixed in dev_main. We must make sure to double check this on the future merge.
