Sonic Visualiser - Bug #1753
Text overlaps in SV on Linux hi-dpi

2016-11-30 02:33 PM - Chris Cannam

Target version:				

Description

See screenshot. Whether because (a) SV is calculating the font size wrong due to hi-dpi logic or (b) it just foolishly isn't expecting the labels to be this long. Switching to "precise" time-label mode makes it worse.
