

## Sonic Visualiser - Bug #1865

### Editing and re-importing CSV file can lose resolution information

2018-11-28 11:26 AM - Chris Cannam

#### Description

- Create an annotation layer with a resolution > 1 sample (any one-sample-per-step analysis)
- Export to CSV
- Edit the file (I assume this means adjusting sample times, but check this)
- Re-import

The visual resolution may have changed, perhaps down to 1 sample (I assume because of time adjustments when editing, but again, let's check). Is there a nice way to avoid this?
