<b>Description</b>			
Feature described as:			
<ul style="list-style-type: none"><li>- Capability to import note files (in the same format as is exported from TONY) and to visualize and edit the lyrics/text in the note objects in an effective way. I would not be picky about where the lyrics is displayed, maybe in the blue note rectangle and maybe only as many characters as fit in there, since that would already be sufficient to identify which text I am looking at.</li></ul>
