| <p>We need to be extra sure that</p> <p><a href="https://code.soundsoftware.ac.uk/projects/soundsoftware-site/repository/entry/extra/svn/reposman-soundsoftware.rb">https://code.soundsoftware.ac.uk/projects/soundsoftware-site/repository/entry/extra/svn/reposman-soundsoftware.rb</a></p> <p>won't ever assign to a project a repository that belongs to another one. For example: can a subproject have the same name as a top-level project? If a repository exists at all when this script runs, it shouldn't ever assign it to any project other than the one it's already assigned to.</p> <p>Review this. Also, document the procedure as we now have it at <a href="https://code.soundsoftware.ac.uk/projects/soundsoftware-site/wiki/AuthenticatingHg">https://code.soundsoftware.ac.uk/projects/soundsoftware-site/wiki/AuthenticatingHg</a> (refer to issue #9).</p> |              |                        |            |
