

Tony: a tool for melody transcription - Bug #1962

Should refuse to open annotation files

2019-11-22 10:34 AM - Chris Cannam

Status:	New	Start date:	2019-11-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Tony should be able to open audio files or Tony session files - no other format.			
At the moment it will happily try to open an annotation file from any of the typical file-open mechanisms, if the user overrides the default file extension as applicable.

#1 - 2019-11-22 10:57 AM - Chris Cannam

Hm, now that I start "fixing" this, I'm thinking there are some real use cases for the bug/misfeature/unintentional feature here. If this was v1.0 it would certainly make sense to fix it, but I'm a bit worried there may be people who are actually relying on it by now.

#2 - 2019-11-22 11:15 AM - Chris Cannam

- File exclude-annotation-files.diff added

Here's a patch that implements this, but I'm going to have to think about it a bit more.

It may be better just to exclude them from the default set of selected files in the open file dialog - which is trivial to do, just pass `FileFinder::SessionOrAudioFile` instead of `FileFinder::AnyFile` to `getOpenFileName`.

#3 - 2019-11-22 01:52 PM - Chris Cannam

Made that last change (default file type) in the repo now.
