Description			
As subject - the colour 3d plot layer gets exported as a stub, without the data in it			

History

#1 - 2020-04-21 09:09 AM - Chris Cannam

(The same is true of spectrogram layers)

There may be a good reason for this - but the test should be, can we re-import the layer and see the same result? At the moment the answer is no, very much not.

(There is a fuzzier area around the peak-frequency spectrogram, which can never be re-imported...)
