EasyMercurial - Bug #229
"In Conflict" description says "Select a file..." but no selection necessary?

2011-07-27 04:24 PM - Chris Cannam

Description

The heading description for the In Conflict file list says

"Select a file and use Merge to try to resolve the merge again."

But the merge is now carried out by just pressing Merge, regardless of whether you have any files selected, right?
