Description			
<p>Hello,</p> <p>I would like to be able to copy program code as provided by Wiki pages etc. and paste it directly into a shell or editor.</p> <p>If the code is displayed with line numbers, there doesn't seem to be a way to copy the code without the numbers though. Would be fab to be able to do that! -- not sure if that's a bug or a feature request.</p> <p>Cheers, Matthias</p>
