SoundSoftware Code Site - Bug #360
mysterious 406 error when trying to retrieve document from repository if not logged in

2012-01-25 10:46 AM - Chris Cannam

Description

Following a link to download a file from within a repo seems to fail if the user is not logged in, giving a 406 content negotiation error rather than the 403 or redirect that would be expected.

Example URL:

https://code.soundsoftware.ac.uk/projects/smdmrd-management/repository/raw/Documents/Deliverables/D4.1%20-%20Policies_propsal.doc
