

SMALLbox - Bug #386

Filepart function arguments changed

2012-02-09 04:50 PM - Luis Figueira

Status:	Resolved	Start date:	2012-02-09
Priority:	High	Due date:

Target version:			

Description

In Matlab R2011b the function *fileparts* now only has 3 output arguments:

Note The fourth output argument of *fileparts* (file version) is no longer supported and has been removed. Calling the function with more than three output arguments generates a warning and will error in a future version.

This causes the demos, for instance, to break.

See: <http://www.mathworks.co.uk/help/techdoc/ref/fileparts.html>
