Description	
<p>It's really a non-issue but steps to follow:</p> <ol style="list-style-type: none">1. click Work Menu2. edit ignore list3. add *.pdf (since pdfs cant merge!!!)4. click save5. notice work is still constantly highlighted. What is also odd is that when doing step 3. the ignore list pops up, but unlike on other selections under other tabs the whole top menu disappears e.e file->open results on the menu still being there and unhighlights 'file'. <p>I'm using OSX10.7.3</p>
