Results from previous projects (e.g. JISC DRMTTrain programme, DaMMSI, Incremental), as well as available material from the DCC and other institutions, will be studied and evaluated. Disciplines will be compared and parts of the available material identified that need to be adapted to appeal to researchers in the area of digital music and audio research. In order to integrate the material into the Vitae/RCUK Researcher Development Framework, used to assign credits by the QMUL Learning Institute, the recently released "Information-handling Lens" will also be analysed.

Deliverable D1.1: Summary and analysis of material already available.
