

EasyMercurial - Bug #509

merge from open branch into a now-closed branch is not displayed

2012-08-10 07:40 AM - Chris Cannam

Status:	New	Start date:	2012-08-10
Priority:	Normal	Due date:

Target version:			

Description

A branch that has been merged into another branch that is now closed (but where the original branch is still open) is shown misleadingly in the easyhg history display -- the merge from the branch head is not shown, even as a "stub".

```
$ hg init repo
$ cd repo
$ touch x ; hg add x ; hg commit -m "add x"
$ hg branch y
$ touch y ; hg add y ; hg commit -m "add y"
$ hg update default
$ hg branch z
$ touch z ; hg add z ; hg commit -m "add z"
$ hg merge y ; hg commit -m "merge y"
$ hg update default
$ hg merge z ; hg commit -m "merge z"
$ hg update z
$ hg commit --close-branch -m "close branch z"
```

Now branch y is still open, and has been merged into a now-closed branch z. EasyMercurial shows this wrongly as in the attached screenshot.

History

#1 - 2012-08-10 07:41 AM - Chris Cannam

- Subject changed from branch head shown incorrectly when merged into now-closed branch to merge from open branch into a now-closed branch is not displayed

Note, if we commit something else to y, the merge still does not get displayed (i.e. this has nothing to do with special treatment for branch heads).
