SoundSoftware Code Site - Bug #529
LDAP-authenticated users don't get institution ID or research description

2012-10-22 10:04 AM - Chris Cannam

Target version:			

Description

If, rather than registering an account manually, you just log in via LDAP using your QM EECS username and password, your account is created (it seems) without any ssamr_user_details entry. We currently have 34 users without ssamr_user_details. 24 of those are LDAP users (of 37 LDAP users total) and the rest are "old" accounts.

- Description updated

Of course, since we know about our own LDAP, we can presumably populate the institution (but not the research description obviously)
