<b>Description</b>			
The user's description of themselves needs to be included in the email sent to the admin advising them to activate (or not) the user. Maybe this happens already, I just can't test it because I don't get the admin emails for the test instance.			

### History

Can be tested in my test sever.

To change the admin password, please log in with admin/admin (I prefer not to change the email address to yours otherwise you will start receiving all my test emails).

Do you think we should also put the user's first and last name?

#### #3 - 2010-12-15 04:34 PM - Chris Cannam

Yeah, I think we should. And their email address -- anything that gives us a better idea whether to approve them or not before we have to go anywhere else than the mail reader.

Testing with revision 387ad4f40686 -- looks good.

(Why isn't the tracker hyperlinking my revision? I thought it did that. I've tried various different formats)

To answer my question: to get the tracker to hyperlink it, use "commit:" followed by the ID. Thus commit:387ad4f40686
