### Move "My Projects" to "My Page"

<b>Description</b>			
<p>The obvious place for My Projects, surely, is on My Page?</p> <p>We can easily add a My Projects box -- the difficulty is ensuring that users get to see it (since the set of boxes is user-controlled and may already have been edited). We can probably work it out somehow though.</p> <p>That has the benefit that it might encourage people to revisit My Page more. If it had some other useful boxes (see e.g. #279) it could actually become useful!</p> <p>Then we can have the Projects link going through some sort of explore interface and Bob's yer uncle.</p>
