Description			
<p>Hi Chris and Luis,</p> <p>it would be great if you could add a link to the specified 'external URL' in the 'related publications' box on the 'overview' page of a project. It would fit nicely next to the 'bibtex' link.</p> <p>I just realised that the external URL at the moment is very much hidden. You have to click on 'publications', then on the respective publication and then scroll to the very bottom to find it.</p> <p>Btw, feel free to change the priority of this issue.</p> <p>Best, Holger</p>
